

...supported by NEEMO !

LIFE Kick-off meeting
Brussels, 3-4 Oct 2019

The External Monitoring Team: Why?

- The need for national / regional knowledge and physical presence
- LIFE projects cover a broad spectrum of themes, requiring diverse areas of expertise to evaluate performance (incl. financial monitoring) and output

The External Monitoring Team: Role?

- ✓ Acts as an **'interface'** between EC and projects
- ✓ **Provides advice to projects** on reporting, legal, administrative, technical, project management, communication, replication and other issues
- ✓ **Spots problems** before they arise
- ✓ But **not entitled to make decisions** on the EC/EASME's behalf and not involved in the management of financial resources
- ✓ Bound by a **confidentiality and independence declaration**

Monitoring and Assessment

- ✓ Report/output evaluations (PR, MtR, FR, main deliverables)
- ✓ Quarterly reporting to EASME on individual projects
- ✓ Visits to projects at least once a year - technical and on-site verification
- ✓ Verification of compliance with the General Conditions (GC)
- ✓ Verification of KPIs provided in the online tool by the beneficiaries, including providing the support
- ✓ Ex-post monitoring missions (closed projects)

Supporting networking and communications

- ✓ Assists in liaising with other LIFE projects with similar objectives/themes => thematic networks
- ✓ Organises thematic platform meetings
- ✓ Liaises with the Communications Team for a wider dissemination of project information and other LIFE communication outputs

Working with the Monitoring Team

- ✓ Always keep your assigned monitor informed of major project developments
- ✓ Share draft reports for advice before finalisation – Note, though, that the monitor provides support but his/her approval does not mean acceptance by EASME!
- ✓ Always send a copy of all correspondence with EASME to your monitor
