

“Innovative use of mycological resources for resilient and productive Mediterranean forests threatened by climate change”

Spain, Italy and Portugal

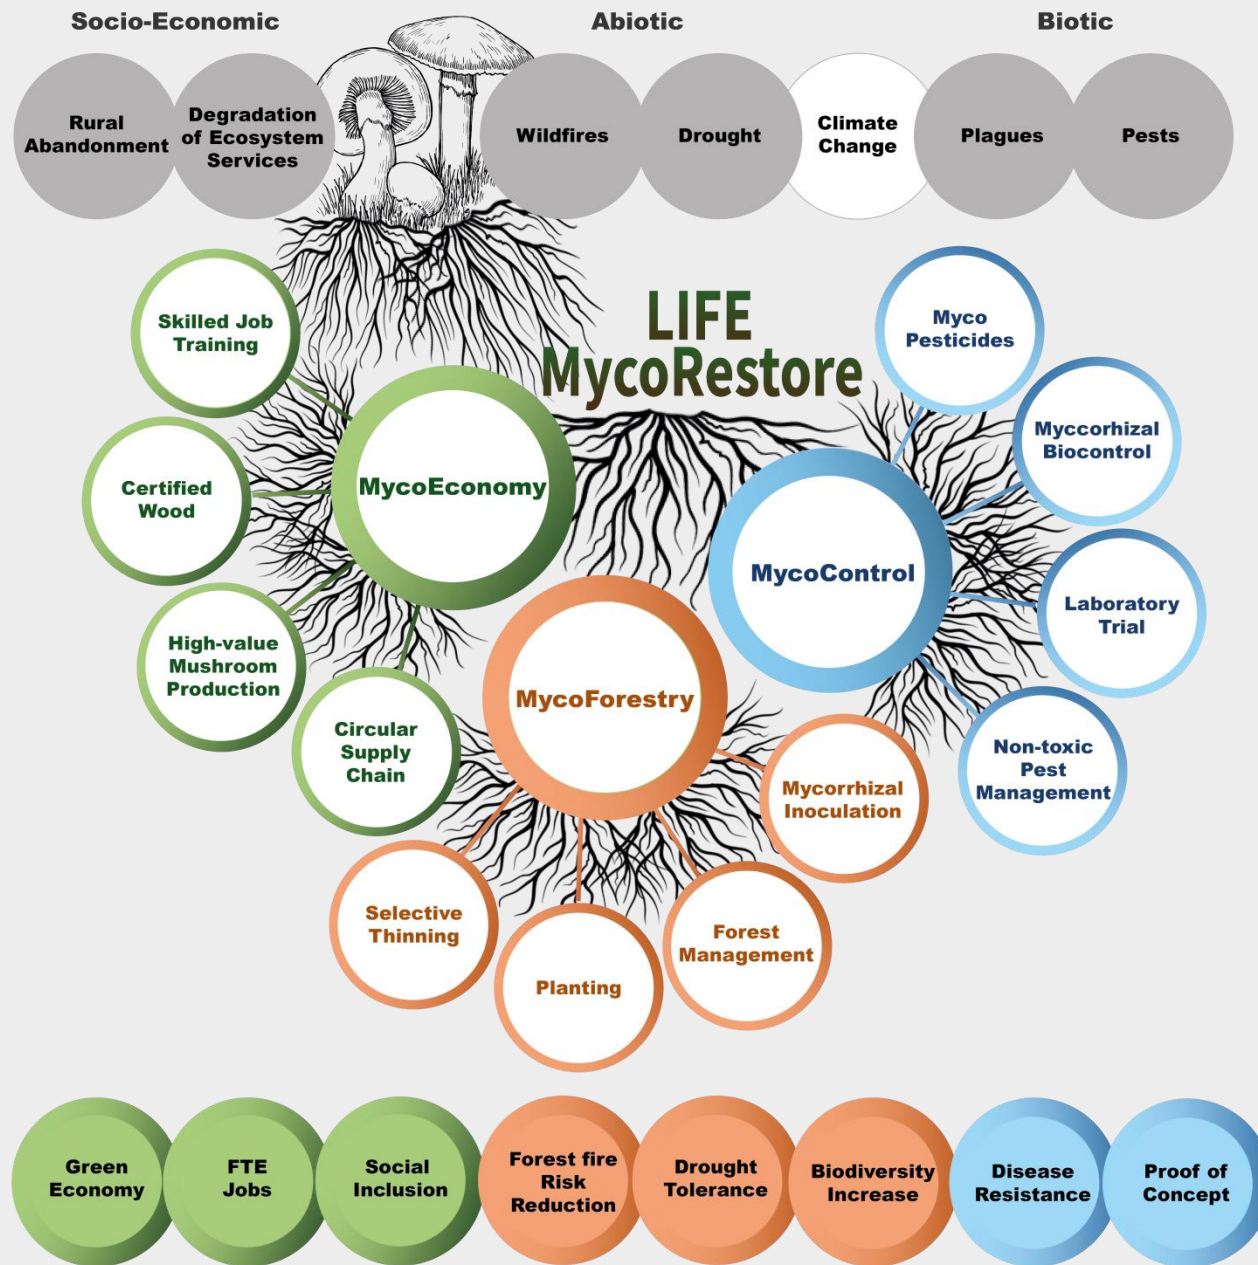

www.mycorestore.eu/en

Stressors

Approach

Impact

Objectives

MycoEconomy
Promote green jobs for people at risk of social exclusion by training them to process wood into substrate and produce high value mushrooms.

MycoForestry
Demonstrate sustainable mycological and forestry management practices for wildfire & drought-resistant forests.

MycoControl
Provide proof of concept on the use of natural myco-control products and native fungal species for reduced pest/pathogen presence in forests.
